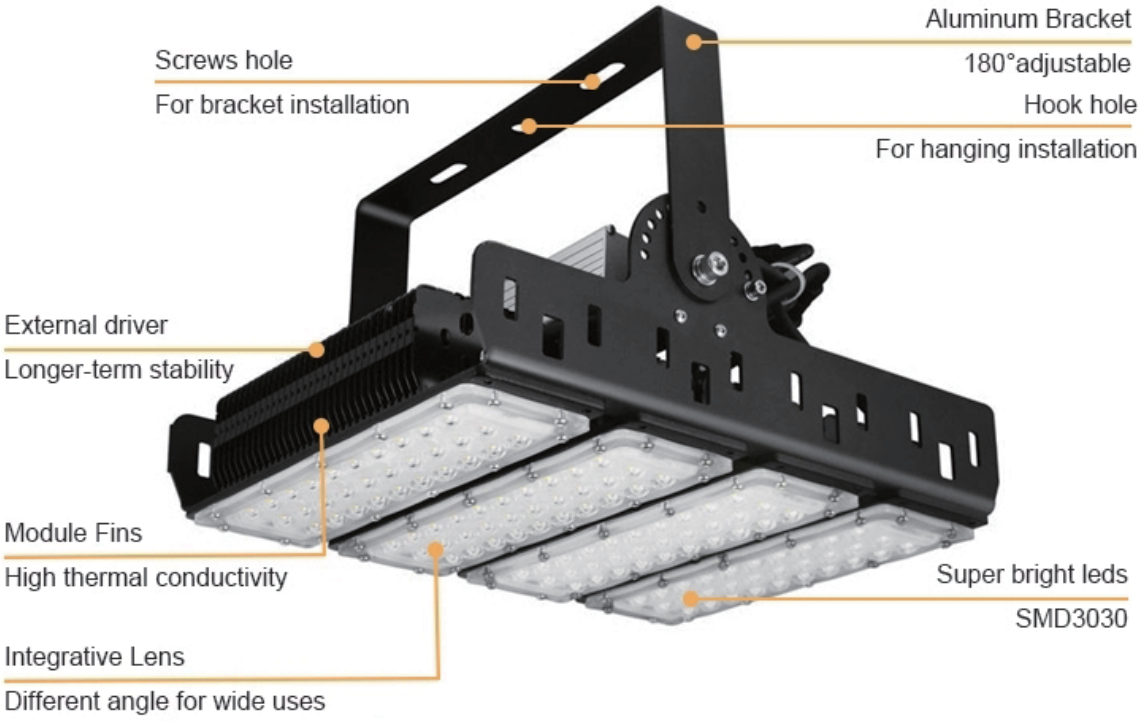
Mercury LED Tunnel Light

Mercury LED Tunnel light offers superior brightness with high quality Philips LEDs, uses high quality components with mounted Meanwell drivers and a thick robust housing, giving increased efficiency and long life. 0-10V Dimmable drivers are also available if you wish to control the lighting levels at various points of the tunnel.

Mercury LED Tunnel Light



Features:

- Modular style design, easy to assemble, replace and repair
- With Aluminum fins heatsink, increasing heat sinking area
- 1060 Aluminum with integrated stamping, high thermal conductivity
- All screw&nuts are made of #304 stainless steel, keep it stable
- Adjustable bracket with holes meet different lighting application
- Lens has high light transmittance, flame retardant, anti abrasion
- UV-proof, provide excellent light distribution
- High quality level waterproof connectors
- IP65 rating

Materials:

- Body: Aluminum
- Cover: PC

Options:

- 1-10V
- DALI

Colors:

- Black

Accessory:

Bracket
